Description

We are business consultants specialized in designing and establishment of business strategies in order to provide our customers profitability increase through business process optimization, profiling, placement and monitoring of new products on the market as well as strategic planning and execution with the aim of improving performance and efficiency.

Fractal is a company created by passionate engineers and IT practitioners, benefits from over 15 years of experience in Enterprise Technologies market.

We have participated in many national and international projects providing services ranging from functional analysis and business process modelling to system integration, maintenance and customer training. Our software engineers have designed and implemented IT solutions for key business processes, where spatial information is used.

We have solid track record of managing projects using SCRUM/AGILE methodologies. Close attention to budget, timeframes and quality combined with continuous interaction with customers allow us to reduce the costs and time necessary to market a product and identify customer needs better. Professional level of our team is confirmed by references we receive from our partners and customers, who use our products or services.
