Bilateral Meetings

- 14:00p.m. - 17:00p.m

Description

The main activity of Aquacut Ltd. is water jet cutting performed with Hungary's first abrasive water jet cutting machine at operating working pressure of 6,000 bars. Not only the excellent cutting quality achieved by our cutting technology but the favorable price make the water jet cutting competitive if compared to the conventional technologies. Cuts without angle failure and over running can be performed with the Dynamic Water jet supplementary unit up to 200 mm thickness.

Areas of Activities

Machine industry (engineering, metal processing etc.)

Supplier Industry (plastic, automotive, electronics)

Offer

Offering our product and services, offering free capacities

- Metal working
- Abrasive water jet cutting on various materials (metal, glass, rock, industrial ceramics, marble, granite, titanium alloys, multi-component materials, plastics, multi-layer materials, PFM)

Cooperation Offered

1. Technical co-operation
2. Manufacturing agreement
3. Sales / Distribution
